

## **Tape and Toddlers!**

Stick tape to the high chair and they will love pulling it off!

**Sometimes simple activities will provide learning, distraction, and entertainment for little ones! This activity will increase their concentration and focusing skills.**

**Adding various shapes and figures will help with language development as they learn new words. They may learn cause and effect as they see what happens when they pull the tape upwards.**

**This is a hand and finger strengthening activity using the pincer grasp. Using coloured tape will increase their colour recognition**
