

Toddlers Playing With Socks

Socks are handy as we have many different sizes and colours in our homes. Roll up some socks into balls. Here are some fun ways to play with socks.

Roll up a bunch of socks of different colours and let your little one put them into a container and take them out. Use a variety of kinds and sizes of containers.

Your little one will learn that things do not disappear when they go out of sight.

Hide a toy inside of a sock. What is inside? The surprise of finding it is part of the fun. With toddlers the skill of pulling the toy out of the sock helps strengthen their hands and arm muscles.
